TERMS OF SALE

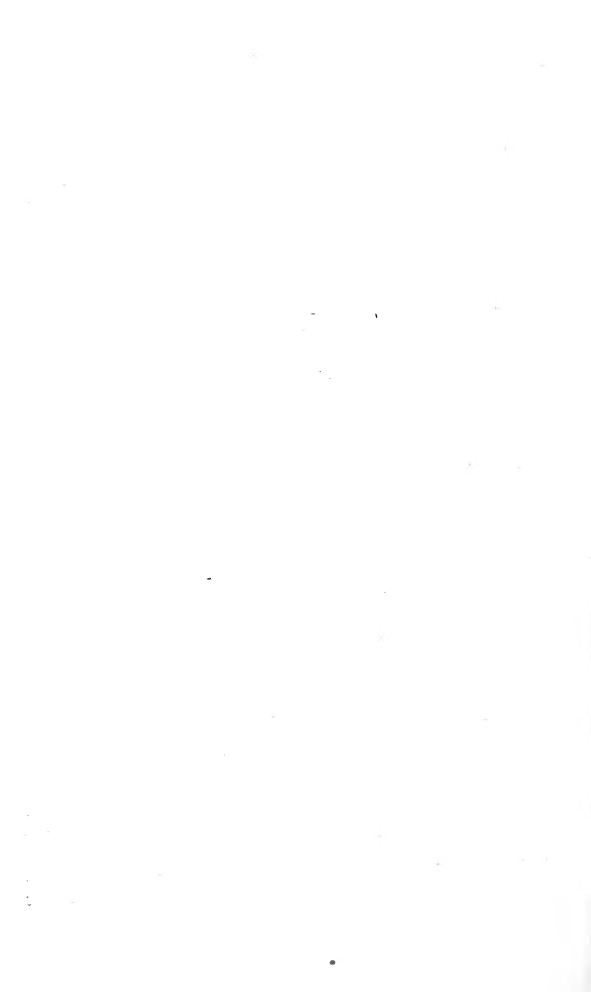

TERMS OF PAYMENT—Prices listed here are based on cash payment. Cash with order for immediate shipment. Booking order will be accepted when accompanied by remittance covering 25% of purchase amount; the balance to be payable at time shipment is demanded. Shipment may be made C. O. D. for balance when one-fourth of the amount of purchase paid with the order. Be sure to include sufficient amount to cover the postage, if you want shipment to be made by parcel post.

TRANSPORTATION—State whether order is to be shipped by parcel post, express or freight. When no instructions are given, shipment will be made, using our best judgment. Our responsibility ceases upon delivery to forwarding companies claims for losses or damages must be made upon the latter.

ALL QUOTATIONS are immediate acceptance, subject to stock being sold. We shall not be subject to any liability should injury befall stock from freeze, fire or any other cause beyond our control.

WE GUARANTEE all stock sent out to be well grown, healthy, true to name and properly packed. Our liability under the foregoing guaranty is limited in amount to original price received.

CLAIM—If, by any possibility, errors should occur, they will be promptly rectified, if claim is made immediately after the receipt of the goods.

LINING OUT STOCK

Plants under this heading may be the one growing in the field, in plant bed under lath shade, in cutting bed, in seed bed, or in pot.

All plants, with exception of potted ones, will be carefully dug in bare root, trying not to injure any part of it, puddled immediately and packed with properly moistened moss, so to reach destination fresh with original dampness. Plants in pots are to be taken out from the pots and wrapped separately in paper, giving all original dirt. However, if so preferred, dirt may be shaken off and wrapped in paper with moistened moss. The work will be done with our utmost care that customers will receive the plants in just same conditions as shipped with dirt. So doing you save much on expressage and we a part of packing expenses; 5% discount allowed for this account of our part.

X indicates once transplanted, XX twice transplanted.

Here and there under this heading you will find "Spring Delivery" remarks. This means the delivery to be made in March, April or May, but entirely subject to conditions of the plants.

CONIFEROUS EVERGREENS

ABIS FIRMA (Japanese Fir)

	10	100	1000
2-4 inch, 2-year, from seedbed.....\$		\$ 5.00	\$40.00

CEDRUS DEODARA

	10	100	1000
4-6 inch, from seedbed		7.00	
6-8 inch, from seed bed		10.00	
8-12 inch, 2-year, X lathhouse grown	2.00	15.00	
12-18 inch, 2-year, X lathhouse grown	2.50	20.00	

CHAMAECYPARIS LAWSONIANA ALUMEI

A most beautiful Lawson Cypress with deep blue colored compact foliage. Thrive at the South as well as up the North.

	10	100	1000
4-6 inch, X lathhouse grown	1.75	15.00	

CRYPTOMERIA JAPONICA VAR YOSHINO

Parent trees of this variety were imported years ago from Japan by us, and we are in belief that no other nurseries in this country ever propagating, so far known to us, this particular variety. It has much finer leaves and more compact growing character than common Cryptomeria Japonica. It grows in symmetrical pyramidal shape. Your attention is called to the point that the leaves change no color in winter nor get burnt in summer like the other. It thrives well where common Cryptomeria Japonica fails to do so. Try once, it will never disappoint you.

	10	100	1000
4-6 inch, X lathhouse grown _____	1.25	10.00	
6-8 inch, X lathhouse grown _____	1.75	15.00	

CUNNINGHAM SINENSIS (Chinese Fir)

It closely resembles to Araucaria but the foliages are narrower, brighter green and less rigid. It has very much more resisting power against cold than Araucaria; it stands the zezro weather! Stately and graceful appearance will be given in both individual and group plantings. This is only variety in fir-like conifer, thrives well in the South. Very vigorous grower.

4-6 inch, from cutting bed (spring			
delivery) _____	10	100	1000
		5.00	40.00
4-6 inch, X lathhouse grown _____	1.25	10.00

JUNIPERUS CHINENSIS PFITZERIANA

One of the best low growing junipers. Very popular in all setcions.

	10	100	1000
From cutting bed (spring delivery) _		7.50	65.00
4-6 inch in 2½ inch pot _____	1.75	15.00	

JUNIPERUS CHINENSIS PROCUMBENS

(Japanese Trailing Juniper)

Best known of the prostrate creeping juniper. A dense mat of blue green foliage. Extremely hardy.

	10	100	1000
From cutting bed (spring delivery) _		7.50	
4-6 inch, 2½ inch pot _____	1.75	15.00	

JUNIPERUS COMMUNIS (English Juniper)

Being propagated by cuttings from best shaped trees of choicest specimens, ours are in uniform of medium broad symmetrical pyramidal shape.

	10	100	1000
From cutting bed (spring delivery) _		5.00	40.00
4-6 inch, X lathhouse grown _____		8.00	
6-8 inch, X lathhouse grown _____	1.25	10.00	
8-12 inch, X lathhouse grown _____	1.75	15.00	

JUNIPERUS COMMUNIS ASHFORDI

Similar to the last, but columnar in habit. Compact and narrow growth.

	10	100	1000
From cutting bed (spring delivery)---		6.00	
4-6 inch, X lathhouse grown -----	1.25	10.00	

JUNIPERUS COMMUNIS COLUMNARIE

Extremely narrow columnal growth, with pointed top.

	10	100	1000
From cutting bed (spring delivery)---		6.00	
4-6 inch, X lathhouse grown -----	1.25	10.00	

JUNIPERUS COMMUNIS DEPRESSA (Canadian Juniper)

A low spreading Juniper. Very hardy and rapid grower. Ours being propagated by cuttings from best shaped specimens they are far superior to those of seedling. We have only strong rooted cuttings for spring delivery to offer you this season as we have already sold out all other grades.

	10	100	1000
From cutting bed (spring delivery)---		5.00	40.00

JUNIPERUS COMMUNIS DEPRESSA AUREA (Golden Canadian Juniper)

Demand being far greater than our supply on account of superiority of our stock this has also only spring delivery of strong rooted cuttings to offer this season.

	10	100	1000
From cutting bed (spring delivery)---		7.50	

JUNIPERUS EXCELSA STRICTA (Spiny Greek Juniper)

Well known dwarf variety in conical shape. Grows rather slow but very hardy.

	10	100	1000
3-5 inch, in 2½ inch pot -----	1.75	15.00	

JUNIPERUS SABINA (Savin Juniper)

Semi-spreading, much branched shrub, with dark green foliage that changes no color by cold nor by heat.

	10	100	1000
3-5 inch, 2½ inch pot -----	1.50	12.50	

JUNIPERUS VIRGINIA GLAUCA

Well known Silver Juniper. We have only small quantity to offer this season.

	10	100	1000
4-6 inch, grafted, X lathhouse grown..	5.00		
6-8 inch, grafted, X lathhouse grown	6.00		
8-10 inch, grafted, X lathhouse grown	7.50		

PINUS DENSIFLORA (Japanese Red Pine)

	10	100	1000
6-8 inch, 2-year from seed bed_____		4.00	25.00
8-12 inch, 2-year from seed bed_____		6.00	40.00
12-18 inch, 2-year from seed bed _____		8.00	60.00

PODOCARPUS CHINENSIS (Japanese Yew)

Dark green leaves with upright stem. Thrive well in sunny spot as well as in shady place. Growth of this variety is not so slow as the other yews, particularly our strain is in nature of upright growth and very rapid grower with large leaves. The plants offering you this year are from cuttings.

	10	100	1000
4-6 inch, X lathhouse grown_____	1.50	10.00	80.00
6-8 inch, X lathhouse grown _____	2.00	15.00	130.00
8-12 inch, X lathhouse grown _____	2.50	20.00	
12-18 inch, X lathhouse grown _____	3.00	25.00	
8-12 inch, 3 inch pot _____	3.00	25.00	

RETINOSPORA FILIFERA AUREA (Golden Thread Retinospora)

A graceful compact evergreen conifer with pendulous thread like branches. Its golden color is exceptionally attractive.

	10	100	1000
From cutting bed (spring delivery)___		7.50	
2-4 inch, X lathhouse grown_____	1.50	12.50	
4-6 inch, X lathhouse grown _____	1.75	15.00	

RETINOSPORA OBTUSA NANA

Dwarf Japanese Cypress. Very dense foliage with bright green color. Very compact grower. One of the best dwarf varieties.

	10	100	1000
From cutting bed (spring delivery)___		7.50	
2-4 inch, X lathhouse grown _____	1.75	15.00	

RETINOSPORA PISIFERA AUREA

Strong growing, rather open habit, pyramidal form, graceful golden foliage.

	10	100	1000
From cutting bed (spring delivery)___		6.00	
- 4-6 inch, X lathhouse grown _____	1.25	10.00	

RETINOSPORA PLUMOSA (Japanese Plume Cypress)

Rapid grower, with foliage arranged in billowy plumes of a rich green. Its irregular outline is pleasing in soft artistic taste in landscape. Thrive very well in the Gulf States as well as in Atlantic coast.

	10	100	1000
From cutting bed (spring delivery)---		5.00	40.00
4-6 inch, X lathhouse grown -----	1.00	8.00	70.00
6-8 inch, X lathhouse grown -----	1.25	10.00	90.00
8-12 inch, X 2-year, well branched---	2.50	20.00	
12-18 inch, X 2-year, well branched---	3.50	30.00	

RETINOSPORA PLUMOSA AUREA

Similar to the above, but its new growth is decidedly golden and very attractive. It grows somewhat slower than green Plumosa.

	10	100	1000
From cutting bed (spring delivery)---		5.00	40.00
4-6 inch, X lathhouse grown -----	1.00	8.00	70.00
6-8 inch, X lathhouse grown -----	1.25	10.00	90.00
8-10 inch, X 2-year-old, well branched	2.50	20.00	
10-15 inch, X 2-yr-old, well branched	3.50	30.00	

RETINOSPORA PLUMOSA ARGENTEA

Silver tipped retinospora of extremely compact and very dwarf growth. Its being in shape of perfectly globular, most suitable for urn, beside formal planting in garden:

	10	100	1000
From cutting bed (spring delivery)---		7.50	
2-4 inch, X lathhouse grown -----	2.00	15.00	

RETINOSPORA SQUARROSA SIEBOLDI

A broad pyramidal with fine juniper-like blue green foliage.

	10	100	1000
From cutting bed (spring delivery)---		6.00	
2-4 inch, X lathhouse grown -----	1.25	10.00	

RETINOSPORA SQUARROSA VEITCHI

Pyramidal but irregular outline together with fine soft foliage of silvery blue green arranged in billowy masses like clouds of smoke gives highly artistic effects to your garden.

	10	100	1000
From cutting bed (spring delivery)---		5.00	40.00
4-6 inch, X lathhouse grown -----		8.00	70.00
6-8 inch, X lathhouse grown -----		10.00	90.00
8-10 inch, X 2-year-old, well branched	2.50	20.00	
10-15 inch, X 2-yr-old, well branched	3.50	30.00	

THUJA OCCIDENTALIS PYRAMIDAL (Hill's Pyramidal)

	10	100	1000
2-4 inch, X lathhouse grown.....	1.25	10.00	

THUJA ORIENTALIS AUREA CONSPICUA

	10	100	1000
8-10 inch, X lathhouse grown, grafted	4.00		
10-12 in., X lathhouse grown, grafted	5.00		

THUJA ORIENTALIS AUREA NANA (Berck- man's Golden)

We propagate only by cutting or grafting with scions from true Berckman's Golden and absolutely true to type.

	10	100	1000
4-6 inch, 2½ inch pot from cutting	1.75	15.00	
6-8 inch, XX field grown	3.00	25.00	
8-10 inch, XX field grown	3.50	30.00	

THUJA ORIENTALIS BAKERS

Prettiest of all pyramidal arbor vitae. Pleasing bright green color, retaining whole summer and winter.

	10	100	1000
From cutting bed (spring delivery)---		5.00	
2-4 inch, X lathhouse grown		8.00	
4-6 inch, XX field grown	1.50	12.00	

THUJA ORIENTALIS BONITA

Compact, dwarf cone-shaped, with foliages of rich green color which remains unchanged through the year.

	10	100	1000
4-6 inch, XX field grown	1.75	15.00	
6-8 inch, XX field grown	2.25	20.00	

THUJA ORIENTALIS COMPACTA

Closely resembles to Bonita but broader and more globular in shape. It grows in most any soil and location.

	10	100	1000
From cutting bed (spring delivery)---		5.00	40.00
6-8 inch, XX field grown	2.25	20.00	
8-10 inch, XX field grown	2.75	25.00	
10-12 inch, XX field grown	3.50	30.00	

THUJA ORIENTALIS GLAUCA

Commonly called blue-green arbor vitae. Closely resembles to Rosedale Hybrid, but color of the foliage is slightly deeper blue. Grows satisfactory in the South.

	10	100	1000
2-4 inch, X lathhouse grown	1.00	8.00	
4-6 inch, X lathhouse grown	1.25	10.00	

THUJA ORIENTALIS ROSEDALE

	10	100	1000
From cutting bed (spring delivery)---		5.00	40.00
2-4 inch, X lathhouse grown -----	1.00	8.00	
4-6 inch, XX field grown -----	1.50	12.00	
6-8 inch, XX field grown, very bushy	2.25	20.00	
8-12 in., XX field grown, extra bushy	2.75	25.00	

THUJA ORIENTALIS TEXANA GLAUCA

Strong and rapid grower. Tall and slender with blue foliage.

	10	100	1000
From cutting bed (spring delivery)---		5.00	40.00
2-4 inch, X lathhouse grown -----		8.00	

BROAD LEAVED EVERGREEN

ABELIA GRANDIFLORA

	10	100	1000
6-8 inch, X field grown		7.00	
8-12 inch, X field grown	1.25	10.00	
12-18 inch, X field grown, bushy.....	1.75	15.00	

ACACIA LONGIFOLIA

An evergreen, densely branched. Leaves long and narrow in color of dark green. Golden yellow flower in early spring.

	10	100	1000
8-10 inch, from seed bed	1.00	7.50	
10-12 inch, from seed bed	1.25	10.00	
12-18 inch, from seed bed	1.50	12.50	
18-24 inch, from seed bed	2.00	15.00	

ANDROMEDA NITIDA

A native evergreen. Large oblong leaves in color of bright shiny green. Small bell-shaped flowers in pinkish white, bloom in early spring. Thrives in acid soil and partly shady spot. Suitable to window box planting, taking place of Ficus Nitida. It stands considerably lower temperature than Ficus Nitida can.

	10	100	1000
From cutting bed		7.50	
3-5 inch, X lathhouse grown	1.50	10.00	

AZALEA

City of Mobile has been known last several years to the world as "Azalea City". Besides those already planted many years ago annual plantings in public places and private residences are totaled many times of a thousand. We dare to say there is no floral display equal to that of Mobile in spring when Azaleas in full bloom. No wonder so many visitors pour in this Gulf City from every direction, March to May, simply to see these beautiful views. Azaleas, in contrary to general belief or rather guess, are by no means hard to grow, providing a certain requirement fulfilled. We are in strong belief that Azalea Indica can be raised without any trouble in all Gulf Coast regions and the Atlantic Coast as far north as North Carolina, and hardy Japanese Azaleas still farther north to the state of New Jersey. We earnestly recommend this flowering bush to fellow nurserymen as well as florists in said territories to try more or less like we did years ago. A few cultural suggestions as the following:

1. Azaleas thrive in soil of acidity. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case Azalea to be planted in such a soil remove original soil and use plenty of leaf mold or peat moss mixed with the other soil no alkali contained or apply Aluminum Sulphate at the rate of 4-inch pot full to a wheelbarrowful of soil.

3. As Azalea root system is very shallow it dries fast. Give enough water to keep roots moist always.

4. Azalea delights in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be selected where all surplus water will run off quickly.

5. Azalea thrives best at partly shady place (when the bush grows large it stands in full sunlight) but many good blossoms cannot be expected if planted under entire shade.

6. Azalea is not very gross feeder. If plenty of leaf mold or such rotten organic matter applied on it does not require any commercial fertilizer. On contrary very often heavy application of fertilizer injures the root system. However, if necessary light application of well rotten cow manure, sheep manure or cotton seed meal is beneficial.

7. Red spider and Thrip some times trouble the growers! Frequent syringing of the plant with plain water will usually keep it down. If this does not control spray or dust the plant with sulphur mixture.

AZALEA INDICA (SINGLE FLOWERING) DESCRIBED IN VARIETIES

BIG LEAVED WATERMELON PINK—Unable to identify proper original name, but known in this section as "Big leaved watermelon pink". This is the very variety most popular in Mobile district. It is vigorous grower, well balanced in shape, tall and spreading also. A splendid specimen of this variety could be seen in Spring Hill, Ala., suburb of Mobile, single plant of 12 feet in height covering 100 square feet. In spring, at height of the season, the plant covered, giving no open space, with bright watermelon pink flowers in mass, forming solid ball of pink in enormous size. It stands also against much severer temperature than most of the other Indica varieties can. This is one of the best single flowering azaleas without question.

BRILLIANT—This is also a splendid variety of watermelon red. Color of flower is slightly darker than the last. It blooms early to late profusely. Leaves small.

BRICK DUST—A low headed bush and very compact grower. Size of flower medium to large, light orange red color, late bloomer, leaves rather narrow.

DUC DE ROHAN—Flower single, medium size, very pretty salmon pink. Leaves shiny and small. Low headed compact growth.

FORMOSA—A most popular variety. Flower single and large, lavender. Leaves medium to large. Very thrifty; easiest of all to grow.

GEORGES' FRANC—Profuse early bloomer. Flower large, flame pink with deep carmine spot near throat. Exceptionally fine, very rare.

HARRY VEITCHII—A beautiful pink flower. Petal is not pointed out so much as the other varieties. Leaves medium, roundish. One of the best pink azaleas but rather slow grower.

INDICA ALBA—Large single, pure white flower. Rapid and upright grower. Very hardy, successfully planted even in Long Island.

INDICA ROSEA MAGNIFICA—Distinct type from the other Indica varieties. Hardy, rapid and upright grower. Foliage very large and thick; sticky secretion from its leaves. Flower single, very large, perhaps largest of all azaleas, white with rose throat, being resembled to some of orchid flowers.

IVERYANA—Rather low compact grower. Flower richly striped with pink on white ground. Leaves narrow, shiny green. One of the best variegated varieties of single flowering. Color of this flower occasionally changes to almost plain white, leaving only faint pink in stripe. However, this is not true Iveryana! Our propagation was done with carefully selected stock and eliminated the other.

MAXWELL—Very hardy. Flower large, carmine red. Leaves rather roundish, soft texture and light green when young.

OMURASAKI—Very large single flower, light lavender. Leaves also very large. Vigorous grower.

PRIDE OF DORKING—Flower large, cerise or bright red, late bloomer. Leaves medium, dark green. Hardy, vigorous grower. One of the best varieties.

PRAESTANTISSIMA—Closely resembles to Pride of Dorking, but blooms a week to ten days earlier.

PRINCE OF ORANGE—Flower large, dark orange red. One of the richest colors of all azaleas. Late bloomer. Leaves medium, dark shiny green. Rather low headed with compact growth.

SHELL PINK—Unable to find original name, but known to us as "Shell Pink" commonly called. Flower light pink, blooms very early. It begins to bloom right after Christmas when there is no flower of any kind in garden. Upright growth and not compact.

VITATA FORTUNEI—Flower single, well striped with purplish pink on white ground. Leaves medium, roundish. Vigorous upright growth, not compact. Blooms very early, as early as Shell Pink. Once in a while solid lavender flower appears among Vitata Fortunei. Selection was made by us with extra pain at the time of propagation—all plain purple flowered plants were eliminated.

HARDY JAPANESE AZALEAS

BENIGIRI—Compact upright grower. Leaves small, dull green. Flower small but abundant, deep bright red.

CHRISTMAS CHEER—A real pleasing Christmas red. Small, dark glossy green leaves. Hose-in-hose type.

FLAME—Brilliant mud red, very early bloomer. Upright and vigorous grower.

HINODEGIRI—Most popular hardy Japanese azalea. Dwarf compact grower. Leaves glossy green, roundish. Abundant flowers of bright scarlet color. Ideal for pot plant.

PINK PEARL—Most noble salmon red color shading light to the center, large full trusses, hose-in-hose type.

YAYEGIRI—Leaves rather thin but very shiny green. Flower salmon red, hose-in-hose type.

PRICE OF AZALEA INDICA

	10	100	1000
3-5 inch, 2½ inch pot	\$ 1.75	\$15.00	\$140.00
4-6 inch, pinched once, 3-inch pot	2.75	25.00	240.00
(Spring delivery)			

PRICE OF JAPANESE AZALEA

	10	100	1000
2-4 inch, 2½ inch pot (spring delivery)	1.75	15.00	140.00

Some varieties of both Indica and Japanese we have in our stock very limited quantity and sold only with orders of other varieties accompanied.

BOTTLE BRUSH (Melrosederos or Callistemon)

A beautiful low headed evergreen shrub. Bright red flowers in cylindrical brush-like spikes opening at spring, and some times in fall again.

	10	100	1000
From cutting bed (spring delivery) —		7.50	
6-10 inch, 3 inch pot —	3.00	25.00	
12-18 inch, 4 inch pot —	5.00		

CAMELLIA JAPONICA

One of the most popular plants in the Gulf Coast region, with glossy green foliage and attractive flowers at winter when no other blossoms found in garden. Very dense and symmetrical in its growth. Propagated only by cuttings taken from the specimens in merit. All colors separated that are white, red, pink and several different types and colors of variegation. All double flowers.

	10	100	1000

6-8 inch, X lathhouse grown _____	3.00	25.00	

COTONEASTER PANOSA

One of the well thriving Cotoneasters in the Southern climate. Silvery leaves together with abundant red berries are most attractive.

	10	100	1000
2-4 inch from seed bed _____		4.00	
4-6 inch from seed bed _____		7.00	
8-10 inch, X lathhouse grown (cutting) _____	1.50	10.00	
10-12 in. X lathhouse grown (cutting) _____	2.00	15.00	

ELAEAGNUS PUNGENS REFLEXA

Branches in drooping and spreading character. Leaves scaly beneath with bronze color. Very useful landscape decoration.

	10	100	1000
From cutting bed		6.00	
2-4 inch, X lathhouse grown	1.25	10.00	

ELAEAGNUS PUNGENS VARIEGATA

Leaves margined with yellowish white. A beautiful bush in compact growth.

	10	100	1000
2-4 inch, in 2½ inch pot	1.75	15.00	

EUONYMUS CARRIERI

Similar to Euonymus Radicans but not creeper. Leaves shiny green, but some times turn to bronze color after severe frost. It grows well in sun as well as in shade; very hardy.

	10	100	1000
From cutting bed		3.00	
8-10 inch, X lathhouse grown		6.00	
10-12 inch, X lathhouse grown	1.00	8.00	
12-18 inch, X lathhouse grown	1.25	10.00	

EUONYMUS PATENS (Siebold Euonymus)

Broad and more spreading habit in growth. Said semi-evergreen in the North, but leaves stay green entire winter in the Southern States. Brilliant scarlet berries in fall are most attractive. Absolutely hardy and free from disease and insect.

	10	100	1000
From cutting bed		4.00	
8-10 inch, X lathhouse grown	1.00	8.00	
10-12 inch, X lathhouse grown	1.25	10.00	

EUONYMUS PULCHELLIS

Very dwarf in nature with small shiny foliage. Desirable for border or low hedge. It may take place of dwarf boxwood.

	10	100	1000
2-4 inch, X lathhouse grown	1.00	8.00	
4-6 inch, X lathhouse grown	1.25	10.00	

EUONYMUS RADICANS, E. R. VARIEGATA
and EUONYMUS KEWENSES (Baby Winter Creeper)—Description and prices will be found under heading "VINES".

GARDENIA FLORIDA

Well known evergreen shrub under the name of Cape Jessamine. Leaves large glossy dark green. Flowers large double, pure white. Very highly scented. Hardy outdoor plant as far north as Nashville.

	10	100	1000
From cutting bed		4.00	30.00
6-8 inch, X lathhouse grown	1.00	8.00	
8-12 inch, X lathhouse grown	1.25	10.00	
12-18 inch, X lathhouse grown	1.75	15.00	
6-8 inch, in 2½ inch pot	1.25	10.00	

GARDENIA RADICANS (Dwarf Cape Jessimine)

It grows not over a foot high but spreads 3 to 4 feet. Rather creeping character. Flower double white, very fragrant. Leaves small and shiny glossy green. A very plant for rock garden. Doubtlessly suitable to florists for Mother's Day trade as well as that of Memorial Day.

	10	100	1000
From cutting bed		4.00	30.00
2-4 inch, 2½ inch pot	1.25	10.00	
4-8 inch, 3 inch pot with flower buds	2.50	20.00	

GARDENIA STRICTA NANA

Closely resembles to Gardenia Florida but smaller. Very dwarf compact growth. Most ideal for pot plant or border.

	10	100	1000
2-4 inch, 2½ inch pot	1.25	10.00	
4-6 inch, 3 inch pot	2.50	20.00	

GARDENIA VEITCHII

Winter blooming gardenia. This is the very variety Eastern florists estimate very highly for winter cut flowers. We have this year exceptionally fine stock of this variety to offer.

	10	100	1000
3-5 inch, 2½ inch pot	2.00	15.00	
5-10 inch, 3 inch pot	3.00	25.00	

HIBISCUS ROSA SINENSIS

Single red, double red and peachblow

	10	100	1000
4-6 inch, 2½ inch pot	1.00	7.50	

ILEX CORNUTA (Chinese Spiny Holly)

Spiny dark green leaves with scarlet berries in winter. We have this year only very small supply of this stock.

	10	100	1000
3-5 inch, 2½ inch pot	1.50		

ILEX INTEGRA

A beautiful evergreen. Leaves oblong with tapering point, shiny dark green. White flowers at May and beautiful red berries in winter.

	10	100	1000
2-4 inch, X lathhouse grown		8.00	
4-6 inch, X lathhouse grown	1.25	10.00	
6-8 inch, X lathhouse grown	1.75	15.00	
8-10 inch, X lathhouse grown	2.50	20.00	

ILEX LATIFOLIA (Big Leaved Holly)

Hardy evergreen shrub. Leaves oval to oblong-lanceolate, very thick, serrate, glossy green above, very large—some times reaches 7 inches long and 3 inches wide. Small flower at May and cluster of red berries at winter.

	10	100	1000
2-4 inch, X lathhouse grown	1.75	15.00	
4-6 inch, X lathhouse grown	2.50	20.00	

ILEX OPECA

Well known native evergreen, growing everywhere wild. However, this wild plant is hard to be transplanted successfully. Moreover it bears no berry in many cases. Our propagation was done by cuttings secured from best berry-bearing specimen and guaranteed to bear.

	10	100	1000
From cutting bed		7.50	
3-5 inch, 2½ inch pot	1.50	12.50	

ILEX ROTANDA

An evergreen shrub or small tree of Japanese origin. Leaves glossy and elliptic, ovate. Pretty red berries at winter.

	10	100	1000
From cutting bed		7.50	
4-6 inch, lathhouse grown	1.50	12.50	

ILEX VOMITORIA

Yaupon tree. Ours propagated by cuttings from heavily berried specimen.

	10	100	1000
From cutting bed		7.50	
3-5 inch, 2½ inch pot		12.50	

ILLICIUM ANISATUM (Anise Tree)

A handsome hardy broad leaved evergreen shrub or small tree. Smooth entire, light green foliage, anise scented when bruised. Narrow and upright in habit of its growth; very hardy.

	10	100	1000
1-2 inch from seed bed75	5.00	

JASMINUM PRIMULINUM

Chinese Primrose Jessamine. Evergreen shrub with arching branches and thick green leaves. Bright yellow flower in spring. Very vigorous grower.

	10	100	1000
6-8 inch, strong rooted layer _____		4.00	
12-18 inch, X field grown _____	1.25	10.00	

LAUROCERASUS CAROLINIANA (Cherry Laurel)

A well known native evergreen. Compact glistening green foliage of medium size. Very attractive as foundation planting, especially in large estate or in park. It also is effective for formal planting when sheared in standard, pyramidal or other shape.

	10	100	1000
6-8 inch from seed bed _____		3.00	25.00
8-10 inch from seed bed _____		5.00	40.00
10-12 inch from seed bed _____	1.00	7.00	60.00
12 inch and up _____	1.25	10.00	

LAUROCERASUS OFFICINALIS (English Laurel)

Medium to large spreading shrub with broad shiny rich green foliage. Very useful plant for Southern planting.

	10	100	1000
From cutting bed _____		7.50	
4-6 inch, X lathhouse grown _____	1.50	12.00	

LAURUS NOBILIS (Sweet Bay or Grecian Laurel)

A beautiful evergreen with glossy dark green leaves which are very aromatic and used in cooking. This shrub thrives very well on the Gulf Coast. Can be sheared to any shape you may prefer.

	10	100	1000
4-6 inch, X lathhouse grown _____	1.25	10.00	
6-8 inch, X lathhouse grown _____	2.00	15.00

LIGUSTRUM CILIATUM VARIEGATUM (Iwaki Privet)

Compact grower, rather small, thick, roundish. Leaves faintly blotched with pale yellow. Although this is not quite so hardy as some of the other Ligustrums, undoubtedly best dwarfed and compact privet in the South.

	10	100	1000
From cutting bed _____		4.00	
4-6 inch, X lathhouse grown _____	1.00	7.50	
6-10 inch, X lathhouse grown _____	1.25	10.00	

LIGUSTRUM JAPONICUM AUREUM

MARGINATUM (Golden Tip Japan Privet)

Much deeper yellow margin on young growth. Bore heavily with purple berries in winter. Contrast with leaves in colors admirable.

	10	100	1000
8-12 inch, field grown, grafted.....	3.00	25.00	
12-18 inch, field grown, grafted.....	4.00	35.00	

LIGUSTRUM JAPONICUM EXCELSUM SUPERBUM

Best of all Japan privets. Leaves variegated with creamy white. Contrast with other green foliages gives exceedingly good effects to view of the garden. Supply limited. Order early.

	10	100	1000
8-12 inch, field grown, grafted	4.00	35.00	
12-18 inch, field grown, grafted.....	5.00	45.00	

LIGUSTRUM JAPONICUM MACROPHYLLUM

A greatly improved strain of Ligustrum Japonicum. Distinguished by exceedingly large thick glossy leaves. The true type and form could only be obtained by grafting.

	10	100	1000
8-12 inch, field grown, grafted.....	3.00	25.00	
12-18 inch, field grown, grafted.....	4.00	35.00	

LIGUSTRUM LUCIDUM COMPACTUM (True Waxy Leaf Privet)

Our strain is in extra dense compact growth with very dark waxy green thick leaves. Very hardy and thrives in most any kind of soil with no particular attention for care. Indeed this is most satisfactory plant for general planting.

	10	100	1000
From cutting bed		3.00	25.00
4-6 inch, X lathhouse grown		6.00	50.00
6-10 inch, X lathhouse grown	1.00	8.00	70.00
10-12 inch, XX field grown.....	2.00	15.00	130.00
12-18 inch, XX field grown	2.50	20.00	180.00
18-24 inch, XX field grown	3.50	30.00	280.00

LIGUSTRUM LUCIDUM PYRAMIDALIS

Its growth is decidedly erect and narrow in form. Leaves dark green and glossy but rather pointed at end and not quite so thick as Compactum.

	10	100	1000
From cutting bed		4.00	35.00
4-6 inch, X lathhouse grown.....	1.00	7.00	60.00
6-10 inch, X lathhouse grown.....	1.25	9.00	
12-18 inch, field grown, grafted.....	3.00	25.00	

LIGUSTRUM REPANDA, Crinkled Leaved Privet

Closely resembles to Ligustrum Pyramidalis but leaves narrow and crinkled.

	10	100	1000
From cutting bed		4.00	
4-6 inch, X lathhouse grown		7.00	

LIGUSTRUM NEPALENSE

Well known hardy privet. Only limited number of seedlings we can offer this year.

	10	100	1000
6-8 inch, from seed bed		2.50	
8-12 inch, X lathhouse grown		4.00	

LIGUSTRUM OVALIFOLUM AUREUM

Golden variegated California privet. Hardy and pretty bush. More showy when planted among green varieties.

	10	100	1000
From cutting bed		4.00	
4-6 inch, X lathhouse grown		7.00	

LIGUSTRUM OVALIFOLUM LODENSE

Very dwarf variety.

	10	100	1000
2-4 inch, in field		2.50	
4-6 inch, in field		3.50	

MAGNOLIA FUSCATA (Michelia Fuscata)

Well known Southern shrub with handsome compact evergreen foliage and sweet carmine edged yellow flower which has strong banana-like fragrance. One of the very useful plants for Southern landscape gardening.

	10	100	1000
2-4 inch, from seed bed		5.00	40.00
4-6 inch, from seed bed		7.50	60.00
4-6 inch, 2½ inch pot (cutting)	1.75	15.00	
6-10 inch, 3 inch pot (cutting)	2.75	25.00	
10-15 inch, 4 inch pot (cutting)	5.00	40.00	
8-10 inch, X lathhouse grown	2.50	20.00	
8-12 inch, X lathhouse grown	3.00	25.00	

MAGNOLIA GLAUCA (White Bay)

A native evergreen tree with large magnolia leaves underneath silvery gray.

	10	100	1000
2-4 inch from seed bed		5.00	
4-6 inch from seed bed	1.00	7.00	

MAGNOLIA GRANDIFLORA

Well known Southern magnolia. We have this year exceptionally fine stock.

	10	100	1000
2-4 inch from seed bed		5.00	40.00
4-6 inch from seed bed		7.00	60.00
6-8 inch from seed bed		10.00	

MALPIGHIA GLABRA (Barbadoe Cherry)

Low headed evergreen shrub with rosy flowers and red berries. Too tender for the Northern planting, but most suitable for pot plant.

	10	100	1000
From cutting bed		4.00	
4-6 inch, X lathhouse grown		6.00	
6-8 inch, X lathhouse grown	1.20	9.00	
8-12 inch, X lathhouse grown	1.50	12.00	

NANDINA DOMESTICA

	10	100	1000
1-2 inch from seed bed		5.00	
2-4 inch from seed bed		8.00	
4-6 in., 2-year-old, X lathhouse grown	2.00	15.00	
6-8 in., 2-year-old, X lathhouse grown	3.00	25.00	

NERIUM (Oleander)

This is one of the well known evergreen shrubs of adaptability for outdoor planting in this region. Last several winters, however, nearly all of them more or less injured by freeze, while we found two distinct varieties passed through in perfect order in spite of all others being killed down to the ground. One of them with large wide foliage, extra dark green color and single light buff flower was found to be the hardiest. The other one of the two (second hardiest) has beautiful semi-double pink flower and slightly narrower leaves compared with the last. This second tree had only a few leaves nipped when we had 16 above zero. We have this year only limited quantity of the said two varieties to offer.

	10	100	1000
6-8 inch, X lathhouse grown	2.00		

OLEA FRAGRANCE (Sweet Olive)

Well known shrub with bright glossy thick foliage and small white or yellow flowers sweetly scented. A few plants of this kind fill the air of entire garden with high odor during winter and spring.

	10	100	1000
From cutting bed		10.00	90.00
2-4 inch, 2½ inch pot	2.50	20.00	
4-6 inch, 3 inch pot	3.50	30.00

8-12 inch, X lathhouse grown	3.50	30.00	
12-18 inch, X lathhouse grown	6.00	50.00	

OSMANTHUS FORTUNEI (Holly Leaved Olive)

Similar to sweet olive, but leaves are thicker and armed with dull spine like American Holly. Less flower, but stands much severer cold spell than the other.

	10	100	1000
2-4 inch, 2½ inch pot	2.50	20.00	
4-6 inch, 3 inch pot	3.50		

PHOTINIA GLABRA

Our introduction of a few years ago and not as yet known to general public (see the picture taken from one of the parent trees in front cover of this price list). It is a broad-leaved evergreen, very hardy. Whenever covered with new sprouts mass of burning scarlet, tinted here and there with older leaves of green, will surely convince you that this is one of the best trees ever appearing on the market. There are several different strains in existence; some of them are far inferior to ours. Years ago when we imported the trees from Japan careful selection was made. Out of the many trees imported we picked up the best few specimens for parent trees, eliminating all others. Ours are surely best and true red leaved Photinia guaranteed. It naturally grows 20 feet high with immense white flowers which are also very attractive. It gives most desirable effects when planted between evergreen conifers. It also gives a splendid view as planted individually in the lawn, trimming in any shape you may desire, such as pyramidal, standard or globe. Exceedingly attractive hedges can be laid also with this plant. Adaptable to almost any soil, yet well drained sandy soil seems more suitable than wet clay.

	10	100	1000
From cutting bed	1.25	10.00	80.00
4-6 inch, 2½ inch pot	2.50	20.00	180.00

4-6 inch, X lathhouse grown	1.25	10.00	
6-8 inch, X lathhouse grown	1.75	15.00	

PYRACANTHA COCCINEA LALANDI

Thorny evergreen with cluster of orange yellow berries at fall and winter. Very attractive, more especially among green foliages.

	10	100	1000
From cutting bed		4.00	35.00
4-6 inch, X lathhouse grown		8.00	
6-8 inch, X lathhouse grown	1.25	10.00	
8-12 inch, X lathhouse grown	1.50	12.00	

PYRACANTHA FORMOSANA (Orange Red Berries)

PYRACANTHA YUNNANENSIS (Coral Berries)

PYRACANTHA SP. (Very tiny leaves, bright scarlet berries)

Prices of the above varieties are same as Pyracantha Coccinea Lalandi.

QUERCUS ACUTA

One of the most beautiful evergreen oaks ever introduced from Japan. The leaves large, bright glossy green. Very rapid grower.

	10	100	1000
4-6 inch from seed bed		5.00	
6-8 inch from seed bed	1.00	7.50	
8-12 inch from seed bed	1.25	10.00	
12-18 inch, X lathhouse grown	2.50	20.00	
18-24 inch, X lathhouse grown	3.50	30.00	

QUERCUS LAURIFOLIA DARLINGTON

Very handsome form of evergreen or Laurel Leaved Oak. It grows more upright than Live Oak. Suitable to shade tree as well as avenue planting.

	10	100	1000
4-6 inch from seed bed		3.00	
6-8 inch from seed bed		5.00	
8-12 inch from seed bed		8.00	

RAPHIOLEPIS OVATA

A very desirable low growing evergreen shrub. Leaves oval, thick and leathery. Mass of pinkish small flowers in spring. Persistent through cold weather.

	10	100	1000
2-4 inch from seed bed		5.00	
4-6 inch, 2-year bed	1.25	10.00	

RAPHIOLEPIS JAPONICA

It grows taller than Ovata. Leaves thick leathery, oblong.

	10	100	1000
2-4 inch from seed bed		6.00	

SERISSA FOETIDA

A low growing evergreen shrub with tiny dark green leaves, yellow margined. Abundant small white flowers. Appearance of the plant somewhat resembles to that of Rock Cotoneaster. Very desirable shrub for border or rock garden.

	10	100	1000
From cutting bed		4.00	30.00
4-6 inch, X lathhouse grown		6.00	
6-8 inch, X lathhouse grown	1.25	10.00	

VIBURNUM ODORATISSIMUM

A valuable evergreen shrub with large green, oblong leaves which turn some times to beautiful red in winter. Small white flower being followed by red berries in cluster. Very hardy and grows in any kind of soil and location. Southern planters ought to use more of these Viburnum varieties for their landscape gardening.

	10	100	1000
From cutting bed		5.00	40.00
8-12 inch, X lathhouse		8.00	
8-12 inch, X lathhouse, 2-year-old....	1.75	15.00	
12-18 inch, X lathhouse, 2-year-old....	3.00	25.00	

VIBURNUM ODORATISSIMUM NANAM

(Awabuki or Coral Berry Viburnum)

Technical name of this variety not being agreed by authorities, we take liberty to use this name temporary. Leaves large, oblong with point, polished dark green in color. Its growth is very compact and a little hardier than V. Odoratissimum. As it bears berries of coral color it has been known in Japan as coral berried viburnum. This is one of the most promising broad leaved evergreens in the South.

	10	100	1000
From cutting bed		6.00	
4-6 inch, X lathhouse	1.25	10.00	
6-8 inch, X lathhouse	2.00		

VIBURNUM SUSPENSUM (Sandankwa)

Another fine viburnum of Japanese origin. It somewhat resembles to Odoratissimum but much smaller in every respect.

	10	100	1000
From cutting bed		5.00	
2-4 inch, X lathhouse grown		8.00	
4-6 inch, X lathhouse grown	1.25	10.00	

DECIDUOUS TREES AND SHRUBS

ALBIZIA JULIBRISSIN (Mimosa Tree)

A beautiful ornamental shade tree with vigorous growth. Our strain is much superior to common mimosa growing around here as we propagated from original trees imported years ago from Japan after careful selection. Its flowers are larger in size and brighter red in color.

	10	100	1000
8-12 inch from seed bed		3.00	
12-18 inch from seed bed		5.00	
18-24 inch from seed bed	1.00	7.50	
2-3 feet from seed bed	1.25	10.00	

ALEURITES (Chinese Tungo Oil Tree)

A medium size tree. Large, bright green and deeply veined leaves. Pinkish white flower of large size abundantly in early spring. It bears apple-like fruits with large nut kernels from which famous Tungo oil produced. Annual importation of this oil from China is said to amount several million dollars. Commercial planting of this plant is now going on extensively in Florida and the Gulf Coast States and most promising. However, just a simple ornamental tree we recommend very highly. It is a rapid grower and suitable for shade tree too.

	10	100	1000
8-12 inch, field grown		3.00	25.00
12-18 inch, field grown		5.00	40.00
18-24 inch, field grown	1.00	7.50	60.00
2-3 feet, field grown	1.50	10.00	

CERCIS CHINENSIS (Japanese Redbud)

Much more dwarf than American Redbud. This particular character makes it more suitable to landscape planting.

	10	100	1000
6-8 inch from seed bed		3.00	
8-12 inch from seed bed		5.00	
12-18 inch from seed bed	1.00	7.50	

CALLICARPA AMERICANA (American Beauty Berry)

A hardy deciduous shrub, growing wild in the South. Clusters of berries in violet color from September to winter are showy. Desirable for lawn or border.

	10	100	1000
6-8 inch from seed bed		2.00	
8-12 inch from seed bed		3.00	

CASSIA MARILANDICA (Wild Senna)

Growing wild in the Gulf Coast. Its brilliant orange red and pea-shaped flowers in pendulous racemes are very attractive during the entire summer season. Planting in group or mass with other shrubs in border very effective.

	10	100	1000
6-12 inch from seed bed		3.00	
12-18 inch from seed bed		5.00	
18-24 inch from seed bed		7.50	

KOELRENTERIA (Goldenrain Tree)

Medium size tree of roundish symmetrical outline. Dark green foliage. Golden yellow flowers cover the tree completely in May.

	10	100	1000
6-12 inch from seed bed		3.00	
12-18 inch from seed bed		5.00	

LAGERSROEMIA INDICA (Crape Myrtle)

Pure white, crimson and lavender.

	10	100	1000
8-12 inch, field grown, 1 year		6.00	
12-18 inch, field grown, 1 year	1.50	10.00	

MORUS (Mulberry)

	10	100	1000
6-12 inch from seed bed75	5.00
12-18 inch from seed bed		1.00	8.00
18-24 inch from seed bed		2.00	12.00

RHUS COTINUS (Smoke Tree)

Also called Purple Fringe. Flower purple in ample loose panicles and on very long pedicels which become profusely plumose, giving the plant smoky appearance.

	10	100	1000
6-12 inch from seed bed		5.00	
12-18 inch from seed bed	1.00	7.50	
18-24 inch from seed bed	1.50	10.00	

STERCULIA (Japanese Varnish Tree)

	10	100	1000
4-6 inch, field		1.00	8.00
6-12 inch, field		3.00	25.00

PALMS, VINES AND ORNAMENTAL GRASSES

CHAMAEROPS EXCELSA (Hardy Windmill Palm)

	10	100	1000
8-12 inch, 4 to 8 leaves, 2-yr-old	1.00	8.00	70.00

COCOS AUSTRALIS (Pindo Palm)

	10	100	1000
1-year-old from seed bed	1.00	8.00	

CYCUS REVOLUTA (Sago Palm)

	10	100	1000
1-year-old bulb	2.00	15.00	

SABAL BLACKBARNIANA

	10	100	1000
10-12 inch, 4 to 8 leaves, 3-year	1.00	8.00	70.00

EUONYMUS RADICANS (Winter Creeper)

A fine evergreen creeper with small shiny green foliage. Very hardy.

	10	100	1000
From cutting bed		3.00	
8-10 inch, X lathhouse		6.00	
10-12 inch, X lathhouse		8.00	

EUONYMUS RADICANS ARGENTO-MARGINATUS

Similar to the above but with foliage beautifully variegated in green and creamy white.

	10	100	1000
From cutting bed		4.00	
4-6 inch, X lathhouse		6.00	
6-8 inch, X lathhouse	1.00	8.00	

EUNYMUS KEWENSIS (Baby Winter Creeper)

Slender thread like vine with very tiny green foliage. One of the cutest creepers in existence. Suitable to covering stumps and rock piles and very plant for miniature garden.

	10	100	1000
From cutting bed		4.00	
4-6 inch, X lathhouse		6.00	
6-8 inch, X lathhouse	1.00	8.00	

FICUS REPENS (Climbing Fig)

To cover foundation of building or wall this is about best vine obtainable in the South. Small leaved evergreen, very rapid grower.

	10	100	1000
2½ inch pot		6.00	
3 inch pot	1.25	10.00	

HEDERA HELIX (English Ivy)

We have two kinds in stock. One big leaved and the other small. Specify when you order which one you prefer.

	10	100	1000
6-8 inch, X lathhouse grown		6.00	
8-10 inch, X lathhouse grown	1.00	8.00	

TRACHELOSPERMUM JASMINOIDES (Confederate or Star Jessamine)

Finest vine to cover arbor, pagoda or screen. Leaves roundish oval, thick shiny green. Star shaped white flower very fragrant. Grand is the view when fully bloomed. If properly trained this is better pot plant than English ivy.

	10	100	1000
4-6 inch, X lathhouse grown	1.00	8.00	
6-8 inch, X lathhouse grown	1.25	10.00	
8-12 inch, X lathhouse grown	1.50	12.00	

HONEY SUCKLE

Scarlet trumpet.

	10	100	1000
X lathhouse grown		5.00	

MISCANTHUS JAPONICA

MISCANTHUS JAPONICA ZEBRINA

Both of these ornamental grasses are very hardy.

	10	100	1000
Small division		5.00	
Medium division	1.25	10.00	

OPHIPOGAN JAPONICA

Dwarf evergreen grass, thrives well in shady place where no other plants can grow.

	10	100	1000
Small division		3.00	20.00
Medium division		5.00	40.00

HEMEROCCALLIS (Day Lily)

Single and double.

	10	100	1000
Small division		3.00	20.00
Medium division		5.00	40.00

SPECIMEN PLANTS

Plants under this heading are growing in the field, twice or more transplanted or roots pruned, compact symmetrical shape of being sheared or pinched. As they are growing on our well drained high land and have abundant fibrous roots they suffer therefore much less from transplanting. Dig them with utmost care of our skilled laborers, balled and burlapped or puddled with clay immediately, so to take no risk of root getting dry. If so desired plants may be shipped without B. & B. (balled and burlapped). In such case our allowance will be 20c each tree for 2-3 feet in size and 15c each for under 2 feet trees discount from original B. & B. price. 15% discount from this price list for carload orders of B. & B. stocks and 20% discount for orders deliver at our nursery ground without boxing.
